

MAKE YOUR LIFE MOSQUITO PROOF

Outdoor Mosquito Eliminating System

BG-MOSQUITITO

Like the BG-Mosquitare, the BG-Mosquitito features a patented combination of attractive visual signals, a specific air plume that mimics convection currents created by a human body and a patented mix of artificial skin emanations (BG-Sweetscent) that are released through a large surface area. The Biogents traps catch significantly more tiger mosquitoes than other traps without carbon dioxide.

The trap is collapsible, has a pack size of 20 x 20 x 19 cm and can easily be taken along into regions with tiger mosquitoes.

How it works

The Biogents mosquitito trap uses attractant Sweetscent to lure the mosquitoes to the vicinity of the trap. Once close the high powered vortex full suck the mosquitoes into a catch bag. The strong suction is designed in such a way that the attractant scent is free of the suction as a cloud to form over the trap.

Applications :

Placement of traps diminishes the local mosquito population when correctly positioned continuously operated (24 hours for a number of weeks) Applied early in the season

Examples of areas that can be protected by traps :

- private gardens
- beer gardens, cafés, and restaurants
- parks and hotels
- campgrounds
- beach pools and forest pools
- facilities for sports and recreation
- rehabilitation clinics and wellness facilities

Biogents worlds leading technology company for mosquito trap already selling in 23 countries

Mosquito free world is a movement and long term objective of Sunrise Group, to help all parts of nations for Mosquito Control and to avoid mosquito borned diseases, We are committed to use the worlds best technology traps and systems to achieve the mosquito free environment.

Our Mosquito Eliminating Systems helps in securing such large structures, organizations, public places, railway & bus stations, parks, defense establishments, soldier colonies, bungalows and rest houses from the threat of mosquitoes and vector-borne diseases. Our systems are free from chemicals and are 100% environment friendly. We are spreading our marketing network Pan India to benefit to all parts of country, we appeal all to take benefits of these technology and get rid from Mosquitoes.
